

SURECrate™ Custom Engineered Solution

A Revolutionary New Alternative to Wood or Steel Crates

The SURECrate™ Custom Engineered Solution is a comprehensive, turnkey alternative that offers all-around protection and stacking strength for large or irregular-shaped products. It's ideal for any heavy or hard-to-box items and is a superior choice to wood crating.

Made from the same 100% recycled laminated paperboard materials as all Laminations® products, each SURECrate Custom Engineered Solution is a complete engineered system that is customized to the precise needs of each situation.

 **Laminations®**
Great Northern Corporation

YOUR **FIRST CALL** FOR PROTECTIVE PACKAGING SOLUTIONS

SURECrate™ Custom Engineered Solution

SURECrate™ System is a complete package that includes:

Consultation: the Laminations account manager and a packaging engineer assess the situation, taking into consideration the product(s) being shipped, the distribution environment involved and any special circumstances.

Engineering: the Laminations engineering team determines the SURECrate System design, provides specs/drawings for assembly, and advises the customer on assembly tools and pallet requirements.

Final Product: precut SURECrate System pieces are shipped to the customer for easy and quick assembly.

The SURECrate™ Custom Engineered Solution is perfect for protecting any large, heavy and hard to-box product, whether it's being shipped across town or around the world. SURECrate is ideal for products like: **Recreational Vehicles | Motorcycles | Lawn tractors | Generators | Machine components**

	SURECrate™ System	Wood Crates
Crate Strength	Laminations paperboard equals or exceeds the stacking strength of wood, even in damp and humid environments.	
Material Cost	Paperboard is less expensive than wood.	Can be costly and difficult to store; because of weight of wood, higher shipping charges and space needed.
Assembly Time	Easy and quick to construct. All pieces come precut and ready for assembly.	Can require two or more people to construct. Assembly also often includes sawing.
International Shipping	Paperboard requires no ISMP-15 or "bug stamp" certification.	Must be made from ISPM-15 certified wood.
Consistency	Uniformly made to eliminate inconsistencies; does not warp.	Often warps and varies in consistency, often resulting in decreased strength.
Safety	No rough edges, splinters or splits from hardware.	Splinters, rough edges and splits are inherent to wood. Can also incur additional risks from sawing.
Disposal	100% recyclable and less material to break down.	Can be difficult and costly to dispose of.
Custom Printing Options	Add a logo, tagline or print code.	
Lightweight	Cost effective when shipping products LTL
