

Polywoven Air Bags

Easy to Inflate and Install, 100% Recycleable

Laminations' Polywoven Air Bags are the best available in the industry. With superior performance, our bags are moisture resistant, easy to inflate and install, and overall more efficient than those made from Kraft paper.

Our air bags are manufactured with the highest quality materials, giving them the strength to stand up to the rigors of the shipping process. They have been tested and certified by the American Association of Railroads (AAR), and can be used in a variety of transportation modes including over the road, intermodal and by rail.

Laminations' Polywoven Air Bags are 100% recyclable, and in many cases can be used more than once. Simply deflate after use and the bag will be ready for your next shipment.

Over the Road

Intermodal

By Rail

Polywoven Air Bags	Paper (Comp)	Certification	Standard Sizes (W)*	Application	Transport Mode
Laminations L1	2 Ply	AAR Level 1	36", 40", 48"	Lateral Void	Road/Intermodal
Laminations L2	4 Ply	AAR Level 2	36", 48"	Lengthwise voids up to 75,000lbs	Rail/Intermodal
Laminations L3	6 Ply	AAR Level 3	36", 40", 48"	Lengthwise voids up to 160,000lbs	Rail
Laminations L4	8 Ply	AAR Level 4	36", 40", 48"	Lengthwise voids up to 216,000lbs and horizontal applications in approved roll paper applications weighing up to 190,000lbs	Rail
Laminations L5	N/A	AAR Level 5	36", 48"	Lengthwise voids up to 216,000lbs and horizontal applications in approved roll paper loading methods	HD Rail/Ocean
Square Bag	2 Ply	AAR	17", 24"	Lengthwise voids up to 24" in case goods	Road/Intermodal
