

FlexRoll® Edge Protection on a Roll

Conforms to any shape, fits any size!

FlexRoll® is a continuous-length roll designed to protect curved, round, and irregularly-shaped products by conforming to their edges to ensure the material beneath does not get damaged during shipping and storage.

Edge Protection on a Roll

- Ideal for converters of paper and other roll stock materials, or any application where lighter-weight protection is appropriate
- Separates rolls from contact with truck walls and floor; an ideal way to create a barrier between individual rolls
- 250 ft. rolls are available in two grades, .040" and .045", to meet the needs of a particular application
- Standard sizes available in 3" band with 3" fingers as well as 3.5" and 5" band with 5" pre-bent triangular fingers
- Compatible with other forms of roll packaging such as headers, banding, and stretch wrapping
- Recyclable and environmentally friendly
- Sold in full pallet quantities
- Sample pack available with 50 ft. coil for trial evaluation

Pre-bent, evenly spaced, sequential pieces allow for quick and easy application to products
