

Extruded VBoard®

Specific applications demand performance you can rely on throughout the shipping and distribution cycle of your product. The strength of Extruded VBoard, made from durable extruded plastic, provides exceptional protection against damaging conditions. It is also 100% waterproof, making it a versatile edge protection option for a variety of humid, wet indoor and outdoor environments.

Rely on the Performance of Plastic

- 100% waterproof
- Ideal for produce, steel, lumber and outdoor storage markets
- Superior performance for flatbed truck product transport
- Professional, high-quality, shiny black appearance
- Holds tighter tolerances than paper VBoard, especially in 90-degree angles
- Takes up less space than paper edge protection for a given amount of strength
- Available in VBoard and VGuard configurations
- Standard sizes available in leg lengths of 1.75" x 1.75" and 2.5" x 2.5" with calipers of 0.060", 0.090" and 0.120"
- Custom-extruded shapes can be developed for large-volume applications
- Made from 100% recycled post-industrial PVC

Your Laminations account manager will recommend the appropriate caliper for your application. Plastic responds differently than paper to various stresses, and actual trial usage is recommended for each new application. Please recycle according to local recycling instructions.

Extruded VBoard® offers the edge protection your product needs in a variety of environments – from food storage to flatbed truck transport
