

VBoard®

YOUR COMPETITIVE

VBoard Applications

Edge Protection

- Prevents costly damages to the edges of stacked products during strapping, handling, transport, and storage.

Stacking Strength

- Adds stiffness and support to pallet loads.
- Tested by qualified independent testing laboratories to compare and/or determine stacking strength of various calipers and leg lengths.

Unitizing/Palletizing

- Combined with stretch film, VBoard cuts packaging costs by as much as 49% when compared with conventional methods.
- This combination increases load uniformity and promotes even weight distribution.

Printed VBoard

Standard Print Options

Use your edge protection to communicate critical information by adding color and messages; standard print options are available in 23 color choices.

Customized Printing and Logo Program

Add your logo, promotional tagline, handling instructions, product code, or other information for extra visibility and brand impact.

Measuring VBoard VBoard has Three Measurements:

VBoard Tomorrow™

Get the most commonly-ordered grades of standard VBoard that are stocked at our manufacturing plants for next-day shipping to customers.
